

Biological Terrorism Awareness

for the Private Sector

Widely recognized as the worldwide leader in providing equipment, testing and training for the field detection of biological agents, Alexeter Technologies is again leading the industry by offering the *first-ever course* for Biological Terrorism Awareness Training to the private sector. Designed in conjunction with emergency first responders, this comprehensive 2-day course provides you with all of the tools and training needed to address biological threats.

tēr·ror·ism, n.

the unlawful use of force against person or property to intimidate or coerce a government, the civilian population, or any segment thereof, in the furtherance of political or social objectives.

Who Should Attend

- Department Heads
- Security Personnel
- Safety Personnel
- Mail Handling Staff
- Medical Staff
- Supervisors

What You'll Learn

The first session, "Awareness", is conducted for the first half-day. It is appropriate for personnel at many different levels in your organization, especially those who handle mail. The second-half of the day is especially appropriate for corporate managers, security, safety & medical personnel. The entire second day is specifically intended for the specialists who will be utilizing the Guardian Reader System to evaluate potential threats.

This two-day course is designed to give you the tools and training needed to properly recognize & evaluate potential chemical and biological threats in the workplace. Specifically, it is intended to train you to determine whether the situation is likely or unlikely to represent a credible threat. It will also train you to make decisions and react properly & safely given the threat level presented.

What Should You Bring

*OSHA-Mandated Action Plan
Personnel Procedures
Company Handbooks*
